## CTECH Inserts & Housing

Weston WI - **CTECH** Aluminum Trailer Cabinets is announcing a high quality line of aluminum Drawer Inserts and Drawer Housings.

These lightweight, cost effective units fit standard industry openings allowing customers to use their open space most productively.

The Insert - designed to be used within, and supported by, existing structures, utilizes an entire opening. It is engineered to be retrofitted into a wide range of applications. The weight of the insert is supported by either using legs provided by **CTECH** or by securing the insert to a structure such as a cabinet or in a pit cart.

The Housing - is designed to function as a stand alone unit. It provides a more finished look and requires less installation time. It can be used separately or combined with other cabinets, office or storage related fixtures. It is extremely useful for outfitting new trailers, truck bodies, shops or retrofitting existing work areas.

Both the Inserts & Housings feature the MotionLacth™ Drawer System:

- Latches when you shut it
- Has dual latch to hold drawer securely during transport
- Easily opens with one finger
- Requires no searching for a latch button
- Heavy duty ball bearing slides

**CTECH** Aluminum Trailer Cabinets, Pit Carts and Accessories ... designed by racers, for racers.
