CTECH Opens New Facility to Deliver Improved Service

Weston WI - **CTECH** Aluminum Trailer Cabinets, manufacturer of high quality trailer cabinets, pit carts and assorted race shop accessories, is pleased to announce the opening of their new 75,000 square ft. facility.

The new facility allows **CTECH** to focus on improved service to customers through increased efficiency in numerous facets of the manufacturing process.

Benefits to Customers include:

- Improved delivery times of custom and standard orders
- Additional space will allow a new stocking program of our most popular products, giving customers the option to get quick service with quality products.
- A new powder coat production line will be in house. The increased control will improve delivery, quality and ability to react to unique situations/requests.
- Increased capacity and consolidation of manufacturing activities will, because more products will be immediately available in the future, improve CTECH's ability to deliver on customer needs and special requests.

CTECH Aluminum Trailer Cabinets, Pit Carts and Accessories... designed by racers, for racers. Visit <http://www.racecabinet.com/> to see the full line of CTECH products or order a catalog featuring information on Cabinets, Pit Carts and Accessories.

In spring 2006, **CTECH** moved into its new facility with a goal of delivering the best product and customer service possible for our customers.

We understand the value of good equipment, and that to win, our customers must prepare themselves, their cars and their teams. **CTECH** products are a part of this process and we share this deep commitment to excel.

Fast • Efficient • Better

Our continuing investment in equipment and consolidating all segments of manufacturing under one roof will allow us to continually improve quality and reduce production lead times. We are poised to meet the growing demand for aluminum trailer cabinets, pit carts and all motorsport storage needs. With our new facility, we have:

- Optimized material & process flow
- Ensured manufacturing efficiencies
- Higher quality products
- Reduced cost
- Increased dependability
- Inventory management capabilities
